

E-Book Manager uploads both secure epub and pdf content to your website

Protects your files

The files are stored and delivered from a robust server solution that digitally protects PDF and reflowable EPUB eBooks for Mac, PC and supported mobile devices/e-readers. With flexible permissions control the system can restrict:

- the number of devices and device types the content can be viewed on
- how long the content can be viewed
- how many pages may be copied
- how many pages at a specified maximum dpi may be printed
- how many copies may be loaned

Works on any platform

The solution is easy to integrate into your existing systems using industry-standard technologies allowing you to host and manage eBooks on your existing infrastructure/website.

The Process

We store your epub and PDF files encrypted on our server in the cloud. When a customer purchases a book from your website it generates a signed download link. When the user clicks the link the book downloads from our server and opens in Adobe Digital Editions – (Stison is transparent in this process). Once successfully downloaded the link cannot be used by anyone else and will not permit a download from another user.

Reporting

The system allows detailed reporting of transaction by time, type and organisation.

Costs

Simple fixed price install costs and a percentage of ebook sales. Check the latest pricing at www.stison.com

“The ebooks have been selling from the moment the new site went live. This is definitely the future of book publishing.”

Karl, Spiramus Publishing

Key Features

- Copy protects downloadable eBooks (EPUB & PDF)
- Integrate with current infrastructure
- Sell or lend
- Pay-as-you-go pricing
- Desktop and mobile support
- Latest encryption technology using Adobe Content Server
- Web based administration

Title	Author	Format	Download Protection	File Size	File Type	Price	Status
Lord of the Rings	J.R.R. Tolkien	EPUB	Yes	10.5MB	EPUB	£9.99	Active
